ANEAS

HIGH PERFORMANCE TRADITIONAL PROTECTION

Aneas is a new and optimised system of profiles ideal for all type of terraces and existing structures in houses and businesses.

Designed with aluminum profiles, its installation can be done through its self-supporting structure or with a façade or slab support.

The many possibilities for manual, automated or smart installation and operation make life easier for installers, workers and users.

BESPOKE AESTHETIC

An aluminum structure composed of **clean lines** with hidden joints between the profiles.

The variety of fabrics, designs and colors allows total freedom to the designer's cre-ativity.

INTEGRAL PROTECTION

With the possibility of installation with or without beams or between walls, **integration with solutions** like **Wind Screens** or **Eros** awnings are possible.

MAXIMUM DIMENSIONS

Aneas is a very strong and elegant system that authorize a maximum line and projection up to 23 ft. without the need of intermediate supports.

WIND RESISTANCE

Aneas offers maximum performance even during moderately windy days and can withstand up to **class 3** wind speeds (30 mph).

MAJOR ADVANTAGES FOR THE STALLER

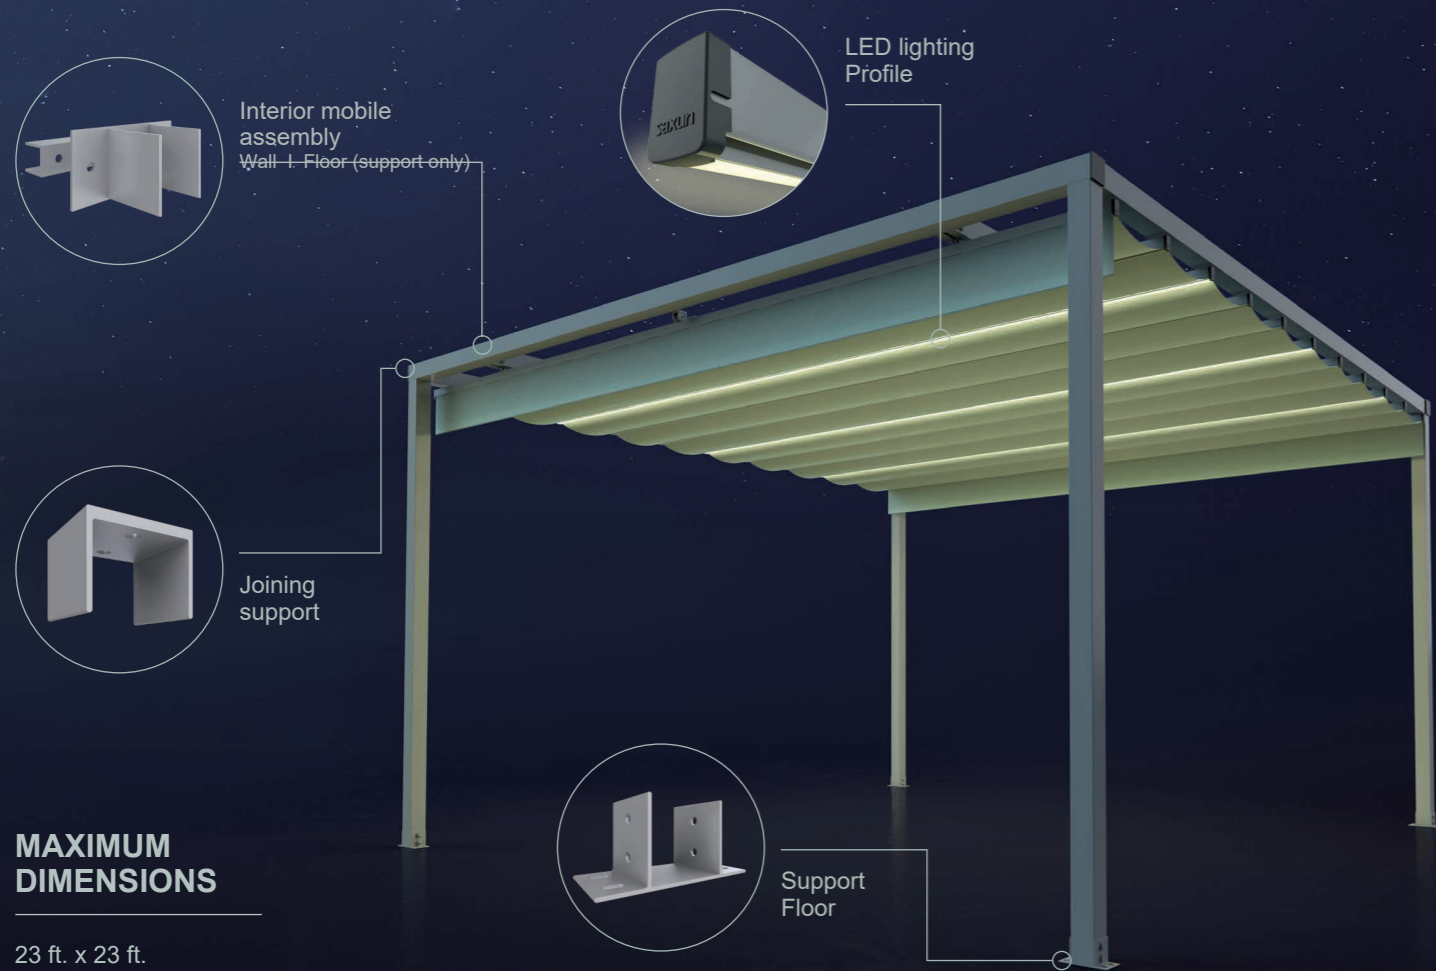

The new profiles and accessories that Aneas allows provide **great comfort and ad-aptation to the place of installation**, facilitating the work of the fitter.

THE PERFECT LIGHTING

The connection aluminum profile between fabric pieces has a built **LED lighting**.

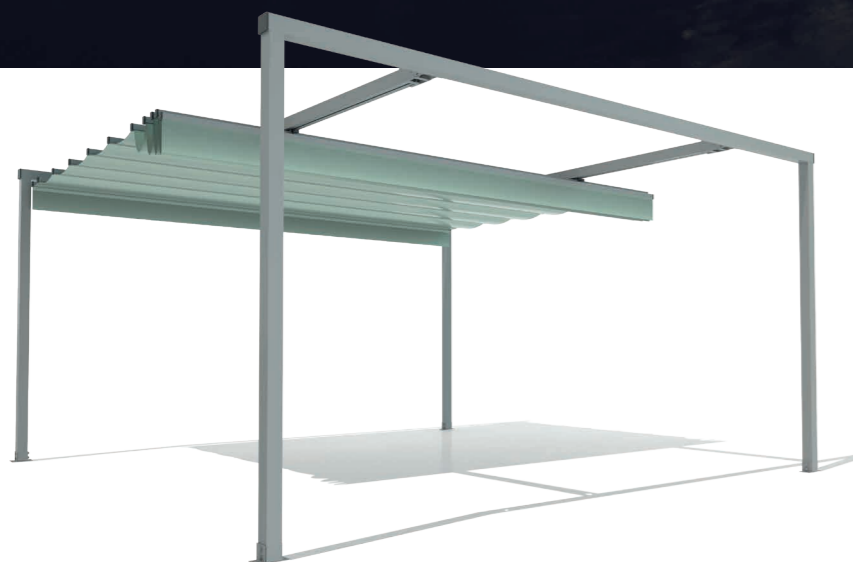

This way, we have ensured the enjoyment of space in an atmosphere of total comfort when night falls.

MAXIMUM DIMENSIONS

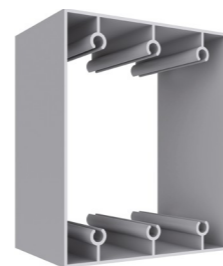

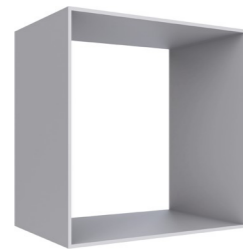

23 ft. x 23 ft.
CLASS 3 • EN 13561

Aneas with dual frame with crossbeams, motorized and LED lighting.

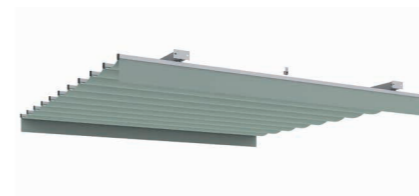

STRONG AND ELEGANT

Its straight and elegant lines, as well as the multiple lacquering possibilities and choice of canvas, will adapt to any architectural and decorative style.

CONFIGURATIONS

BETWEEN WALLS

The **Ideal** option for **patios or gardens** that have mounting bases as walls and that facilitate the creation of integrated and balanced environments.

It is made up of longitudinal profiles attached to the fixing support and other transversal profiles that join both sides.

FRAME CROSSBEAMS

This system is adapted to **all types of open spaces** such as terraces or patios

The incorporation of crossbeams offers great stability to the structure and makes it possible to install solutions such as **Eros** or **Wind Screen**.

By choosing the double crossbeam option, it becomes a self-supporting system.

FREE-STANDING FRAME

Similar to the frame with crossbeams with a fundamental aesthetic difference: it does not have side beams.

It is characterized by the purity of its lines and integrates perfectly into **all types of spaces** where there is a need for protection.

Accept the double frame option.

COMPATIBLE PRODUCTS

Thanks to the range of Eros and Wind Screen awnings, the user can get the maximum performance of Aneas thanks to the ability of this system to close the space perimeter and provide greater protection and privacy.
